asnepmocr al idniuQ ,erup Collecting all Explorer Notes unlocks an additional 10 levels for your character. Note Locations All available explorer notes except 11 are listed below. The other 11 are the boss dossiers, there are currently three creatures with an unobtainable dossier, these being the Griffin from  
Ragnarok, the Deinonychus from Valguero, and the Tropeognathus from Crystal Isles. For an interactive map of Explorer Notes and other collectibles, see the following pages: Canon Explorer Notes Notes from ARK Survivors Changelog Notes / trivia During the development process Helena's name might have once been Elimisha and Nerva's name  
might have once been Gellia according to the DevKit. Due to the similar looks and name, Helena Walker could be an Easter egg to the European show, Primeval's Hellen Cutter Currently you can't open the notes while in pause mode (at least in single player), i.e. pressing Esc and using the Survivor Profile menu item at the bottom. Instead you can go  
into your inventory and use the Survivor Profile button at the top right. Dying or using fast travel (sleeping bags/beds) will cancel the double XP multiplier The XP bonus stacks, so collecting one explorer note, gives 600 seconds double XP, and if another explorer note is collected before the first double XP expires, then 600 seconds will be added to the  
remaining XP time from the previous Dossiers. As such it is possible to get a fast flyer and collect a few in quick succession before taking on a titanosaur or Alpha for best possible XP gains The double XP does not affect XP shared To tribe members Some of the additional text in the Raia tablets are the names of Studio Wildcard Developers. In ARK  
Digest 49, the woman riding the raptor on the box art was confirmed to be Helena. Since 280.114 and the release of the Extinction Chronicles event, an unknown author's Explorer Notes have appeared in several locations, with the Three at the Capo Arenas. The notes are related to the extinction DLC, and unlike the previous notes, these have  
entered the form of a hologram with what seems to look like a specimen implant that projects the note itself. In the same way, at 299.26, the release of Genesis Chronicles event, "spiritual disturbance" are seen in some of the caves, with the first three on the main island. The notes are related to Genesis: Part 1 DLC, and unlike all the notes so far,  
requires Mini-HLNA SKIN equipped for any form of note to activate nearby. ARK: Evolted survival> General discussions> Thematic details cannot discover the note of the explorer? I found a note of explorer on the back of the ancient aberration device, it is an orange box similar in the design to the notes of Diana, but I cannot open it and the game I  
don't give me the note. Is it a problem or do I have to do something before? Playing SP note: this is only to be used to report spam messages, advertising and problematic (harassment, fights, or rude). ARK: Evolution of survival>> f7pi Ç i i i i i fiosis £ i j i u n t i o n s i m p l i i i d e r e p t i d e o n a b e r r a t i o n l o r e - i n s e a r c h o f a p o s i t i o n d e s c r i b e d i n t h e n o t e s o f  
the explorer. In the notes of Helena numbers 15 - 19 for the aberration map, it goes in detail by talking about an area with human beings in tube as rooms, also mentioning fetuses and eggs located under a bridge in a large cave too deep to see the bottom. It also seems that this is located inside the station, which must be teleported to. Is there any  
way to get to the area that Helena was describing? Does it also exist in the game?
